- Silk yarn are made using an innovative formula.
- Combined action of silk proteins and natural skin proteins leads to a higher antibacterial action.
- Orthogonal construction for maximum comfort and softness

CARE AND MANTAINANCE

Correct use and proper maintenance of SIlkGenera products will allow you to get the most of its enormous potential and outstanding characteristics. Silk is an exceptional fiber which naturally requires just a few simple precautions in order to enjoy your very own wellness and beauty laboratory every day:

- As long as it is in contact with air, silk naturally maintains a necessary level of humidity, just enough to make it perfectly soft and increase your well-being.
- Clean stains individually with a white cloth and mild soap, leaving it to air dry.
- SIlk is a delicate fibre (while strong and resistant). Please follow these washing instructions: hand wash maximum temperature 40°C. / Short wash. / Do not use aggressive soaps. / Do not tumble dry. / Dry naturally on a horizontal surface. / Do not twist, do not wring. / Do not expose to direct sunlight. / Iron wet at max 110°C using a protection cloth.
- You may also use cold dry cleaning option from professional and trustworthy dry cleaners. Cold dry cleaning means washing with a cold machine. Also please mind that washing must be delicate and drying at low temperatures only.
