

Silk cheek pillow

Refuge of softness and beauty

BUYING GUIDE

Key

T.Silk® cushions

- Fight allergies naturally
- Promote natural breathing
- Favour the transpiration of the skin and scalp
- Do not create heat accumulation
- Do not cause accumulation of humidity, a favourable condition for the proliferation of mould and mites bacteria
- Thermoregulate the pillow/head neck and shoulders system
- Especially in the version with T.Silk® silk Exterior, they favour regeneration and repair of skin and hair tissues

Coefficient of thermophysiological comfort

This represents the equilibrium value of two quantities: **thermal resistance** (capacity to retain heat) and **evaporative resistance** (degree of breathability). It is a complete index. Scale of values between 0 and 1. A value of 0 means that the product has absolutely no breathability. A value of 1 means that the product has the thermal resistance and water vapour resistance of an air layer of equal thickness (excellence).

Comfort index T.Silk®

From 0 to 0.20

Uncomfortable. Product responsible for the perception of coldness given by the sweating/cooling/sweating cycle

From 0.20 to 0.40

Critical comfort with heat build-up and vicious cycle of sweating/cooling/sweating

0.40 to 0.60

Minimum comfort.
Unstable balance between heat and perspiration.

0.60 to 0.8

It keeps the pillow/head/neck/shoulders temperature constant, letting it transpire and allowing no accumulation of humidity

0.80 to 1.00

It keeps the pillow/head/neck/shoulders temperature constant, letting the skin and scalp breathe. Perfect thermoregulation and lack of moisture accumulation. Promotes the regeneration of skin and hair.

T.Silk1000

Soft/compact pillow with cervical support for better ergonomic position. Perfect head/neck/spine alignment and perfect adaptation to the morphology of the neck/head system. Ideal for tummy time and back position. Reduces the pressure on the neck.

EXTERIOR

T.Silk fabric 100% Silk with proteins Silks (Fibroin and Sericin)
Alternatively, very fine cotton canvas

PADDING

Padding in 100% Silk T.Silk 1000g
Thickness 12/16 cm

T.SILK® COMFORT INDEX

Standard

- 100% T.Silk silk thermoregulating padding
- Flap External padding 100% T.Silk Silk
- Interior in 100% T.Silk Silk Padding
- Antibacterial, anti-mite, antiallergenic
- Exterior in the finest and innovative T.Silk 100% Silk Fabric
- Silk thread with innovative SilkProtein formulation
- Anti-chafing and thermoregulating

DeLuxe

- 100% T.Silk silk thermoregulating padding
- Flap External padding 100% T.Silk Silk
- Interior in 100% T.Silk silk "Soft memory padding"
- Antibacterial, anti-mite, antiallergenic
- Exterior in the finest and innovative T.Silk 100% Silk Fabric
- Orthogonal construction for one maximum softness
- Silk thread with innovative SilkProtein formulation
- Anti-chafing and thermoregulating
- Customisations on request

T.Silk1200

Soft/compact pillow with cervical support for better ergonomic position. Perfect head/neck/spine alignment and perfect adaptation to the morphology of the neck/head system. Ideal for position on the back. Guarantees neck support and shoulder alignment.

EXTERIOR
