- **Slim** cm. 22,50 x 14,50
- **Regular** cm. 23,50 x 15,50
- **Large** cm. 24,00 x 16,00

COLOURS

- Ivory
- Black
- Custom

Sale: Sold individually or in packs of 5,10,20,50 units.

CARE AND MAINTENANCE

Correct use and correct maintenance allow to fully exploit the enormous potential and characteristics of the products. Silk with its exceptional technical qualities and its naturalness requires some simple precautions to be able to experiment and use a wellness and protection laboratory every day:

- The air-silk ratio allows the latter to naturally regain its relative humidity, improving its softness and volume and increasing the level of well-being
- In case of stains, clean them individually with a white cloth and no soap aggressive by letting the product air dry.
- Silk is a resistant but very delicate fibre. Washing must be done with great care, preferring hand washing: max temp. 40°C. -Short wash -Do not use aggressive soaps - Do not dry in the drum - Dry naturally on a horizontal surface - Do not twist do not wring - Do not place in direct light - Iron at max 150°C. with damp product using a protective cloth (small wrinkles depend on the different structure of the 3 fabrics). Do not dry clean.
- Product washable up to 5 times while keeping the water repellent and sanitizing characteristics intact.

Notes:

- Non-sterile packaging. Washing before use is recommended
- In compliance with the indications of the Circular of the Ministry of Health 0003572-P- 18.03.2020. The use and sale are governed by Article 16 c. 2 DL n.18 of 17.03.2020.
- It is not a medical device (DM)
- It is not personal protective equipment (PPE)

Directive 93/42/ECC (Surgical masks) and Regulation 2016/425 (FFP2 type filter masks) of the European Union have defined standards for professional use and healthcare professionals. They define the specific directives to ensure the protection of the user and of the various subjects on the basis of the design and production characteristics. The multi-layer masks are designed for the public and are recommended for use in public environments, during social life and together with social distancing and hand washing are the recommended methods for protection.

The masks do not show the CE mark as it is not required for masks not used which one
