## SETINO TOPPER

### INNOVATIVE TECHNOLOGY TO MEET YOUR NEEDS

**Setino Topper** is a highly flexible system that can be adjusted to your personal needs. If you are looking for a **soft silk embrace** and superior comfort in every moment of you sleep, it will be just right for you.

**Click-clack fasteners** positioned along the edges of the Setino mattress cover allow to place an **additional Setino Topper** above the existing one. You can choose one of **different filling weights** available.

This can be done **at any given moment**, and then it can be as **easily taken off if necessary**, depending on the weather or change of preferences in softness, lightness and comfort.

## CARE AND MAINTENANCE

Ensuring proper maintenance and careful use will allow you to take full advantage of **Setino Topper's** full potential and outstanding characteristics. Silk is an exceptional fiber which naturally requires a few simple precautions in order to make its **natural comfort** last long.

- In contact with air silk regains its relative humidity in a natural way, improving its softness and volume, increasing the level of thermo-physiological comfort typical of T.Silk.
- Might you need to treat stains, clean them individually with a white cloth and mild soap, leaving it to air dry.
- If washing is absolutely necessary, use cold dry cleaning option from professional and trustworthy dry cleaners. Cold dry cleaning means washing with a cold machine, washing must be delicate and drying at low temperatures only.
- If washing at home: hand wash maximum temperature 40°C. / Short wash. / Do not use aggressive soaps. / Do not tumble dry. / Dry naturally on a horizontal surface. / Do not twist, do not wring. / Do not expose to direct sunlight. / Iron wet at max 110°C using a protection cloth.
